

United States Senate  
WASHINGTON, DC 20510

January 14, 2014

Ambassador Michael Froman  
United State Trade Representative  
Office of the United States Trade Representative  
600 17<sup>th</sup> Street, NW  
Washington, DC 20508

The Honorable Thomas Vilsack  
Secretary of Agriculture  
United States Department of Agriculture  
1400 Independence Avenue, SW  
Washington, DC 20250

Dear Ambassador Froman and Secretary Vilsack,

We write to express our concern regarding trade restrictions on U.S. chicken products by several countries participating in the Trans-Pacific Partnership (TPP) and to urge you to consider them and do everything you can to provide for open markets and fair trade of U.S. chicken products. The TPP represents a significant opportunity to expand U.S. chicken exports and bring increased economic benefits to chicken growers and companies across the country. We are encouraged by the progress you have made during the latest round of trade talks. Your ongoing commitment to seek the highest possible standard agreement is appreciated.

As you know, the U.S. chicken industry is a major economic driver in communities across the country. The industry supports over 1 million jobs and generates over \$200 billion in annual economic impact. Nearly 20% of broiler chickens and products produced in the U.S. are exported, representing a significant portion of total sales, and a critical part of the success of the industry. There is incredible potential to grow the level of exports from the U.S, and addressing these barriers to U.S. chicken products during the TPP negotiations is critical to making that potential a reality.

We are particularly concerned about Canada's supply management program that severely limits U.S. chicken exports to our northern neighbor. As you know, despite ratification of the North American Free Trade Agreement (NAFTA), Canada has continued to impose restrictions on imports of U.S. chicken products and the U.S. has been unsuccessful in lifting those restrictions. We urge you to continue to work to address this long-standing, unjustified issue during the TPP negotiations and create true free trade for U.S. poultry.

Similarly, we are concerned about Australia and New Zealand's use of non-scientific barriers related to poultry disease that prohibit trade of U.S. chicken products to these countries. If Australia and New Zealand are to participate in the TPP, they should conform to World Organization for Animal Health (OIE) standards.

Finally, Japan's administrative guidance sets an unofficial quota on U.S. chicken products. Japan is a significant potential market for U.S. chicken products and a truly open trade agreement would create substantial opportunity for growth.

Thank you again for your ongoing commitment to moving the TPP negotiations forward. We urge you to continue to fully engage the other eleven participating countries on these priority issues for U.S. chicken producers. We look forward to working with you on these issues going forward.

Sincerely,

Senator Christopher Coons

Senator Johnny Isakson

Senator Thomas Carper

Senator Roger Wicker

Senator Barbara Mikulski

Senator John Cornyn

Senator Mark Warner

Senator Robert Portman

Senator Benjamin Cardin

Senator Saxby Chambliss

Senator Tim Kaine
